

Fig 1A Boosting effect of immunisation with the DNA vector containing the TT-p21-35(Ile28Asn) insert

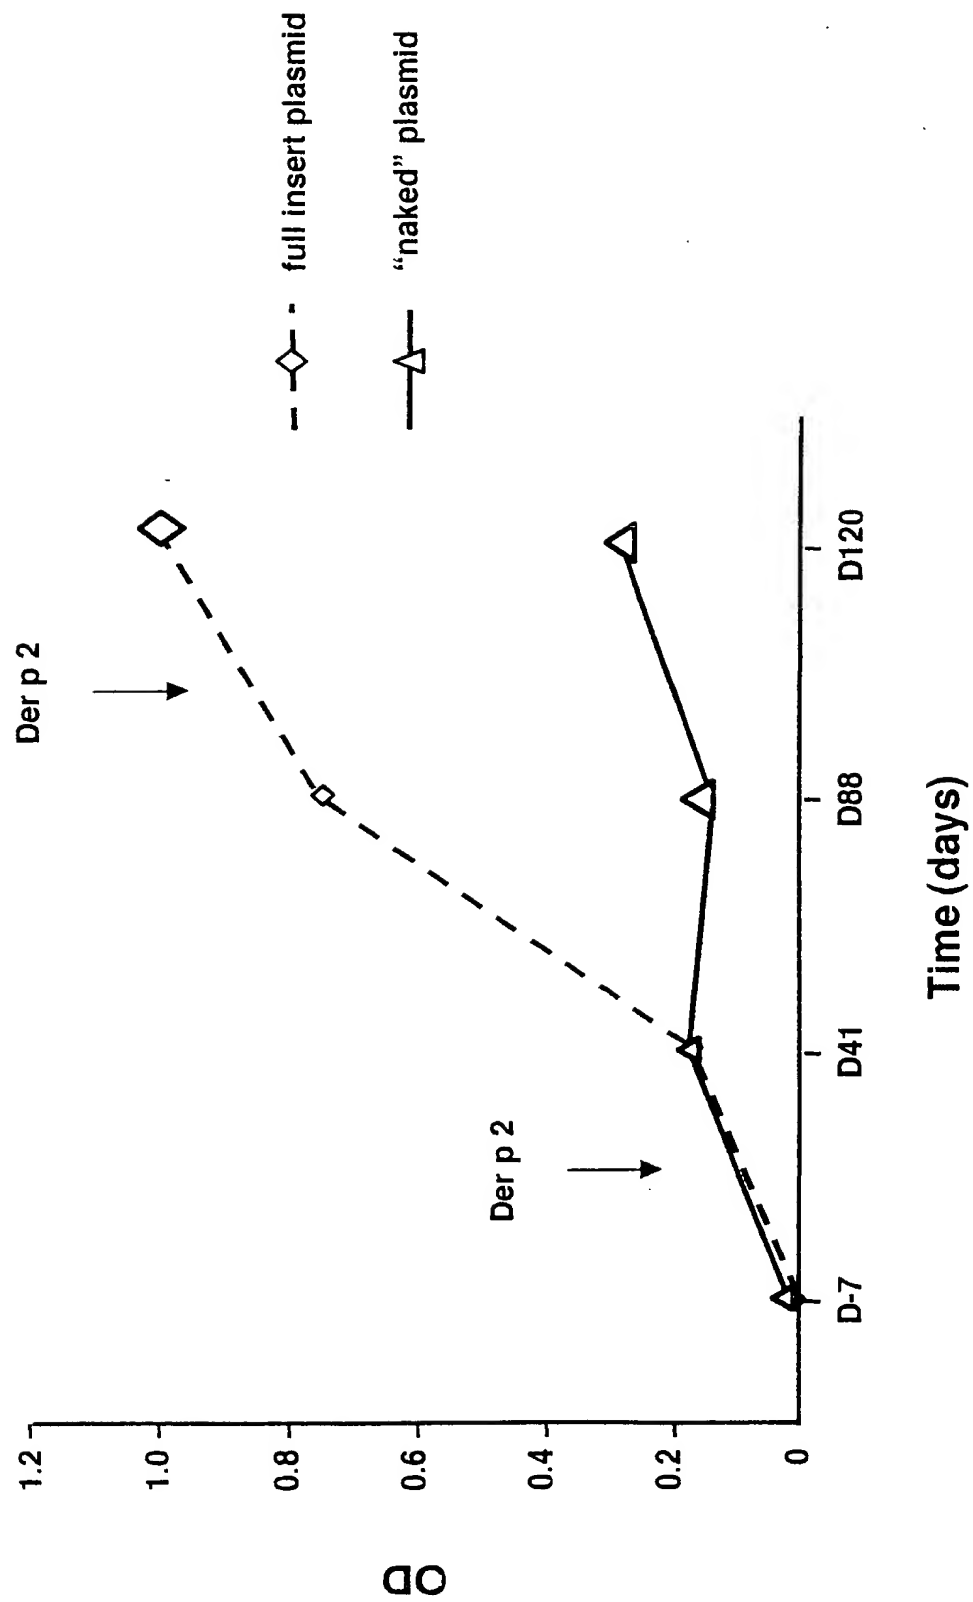

Fig 1B **Boosting effect of TT priming**

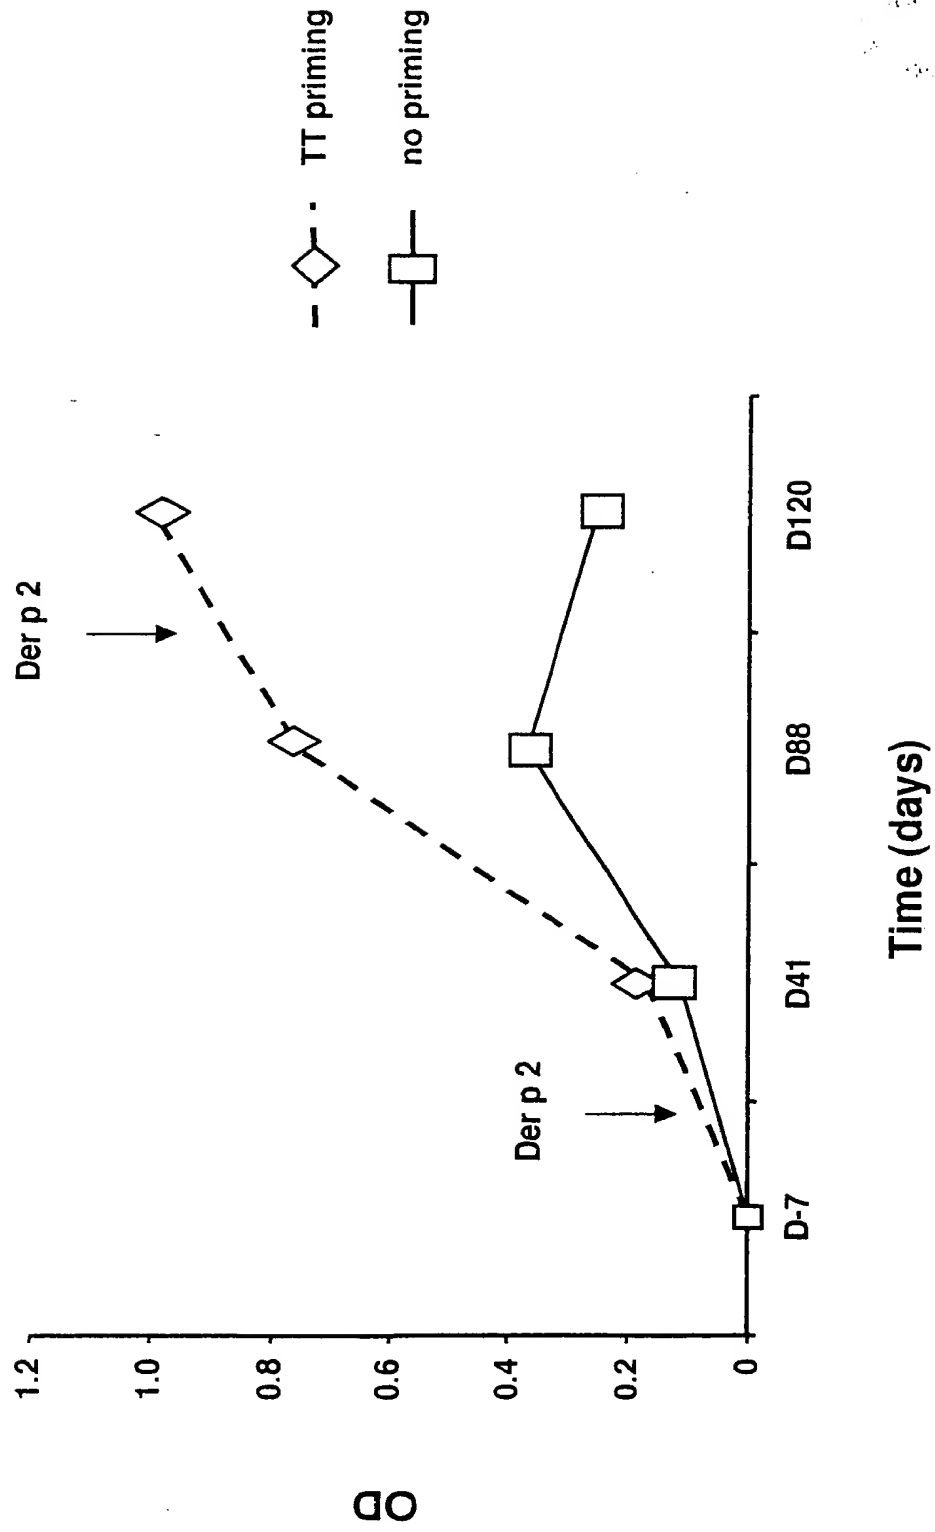

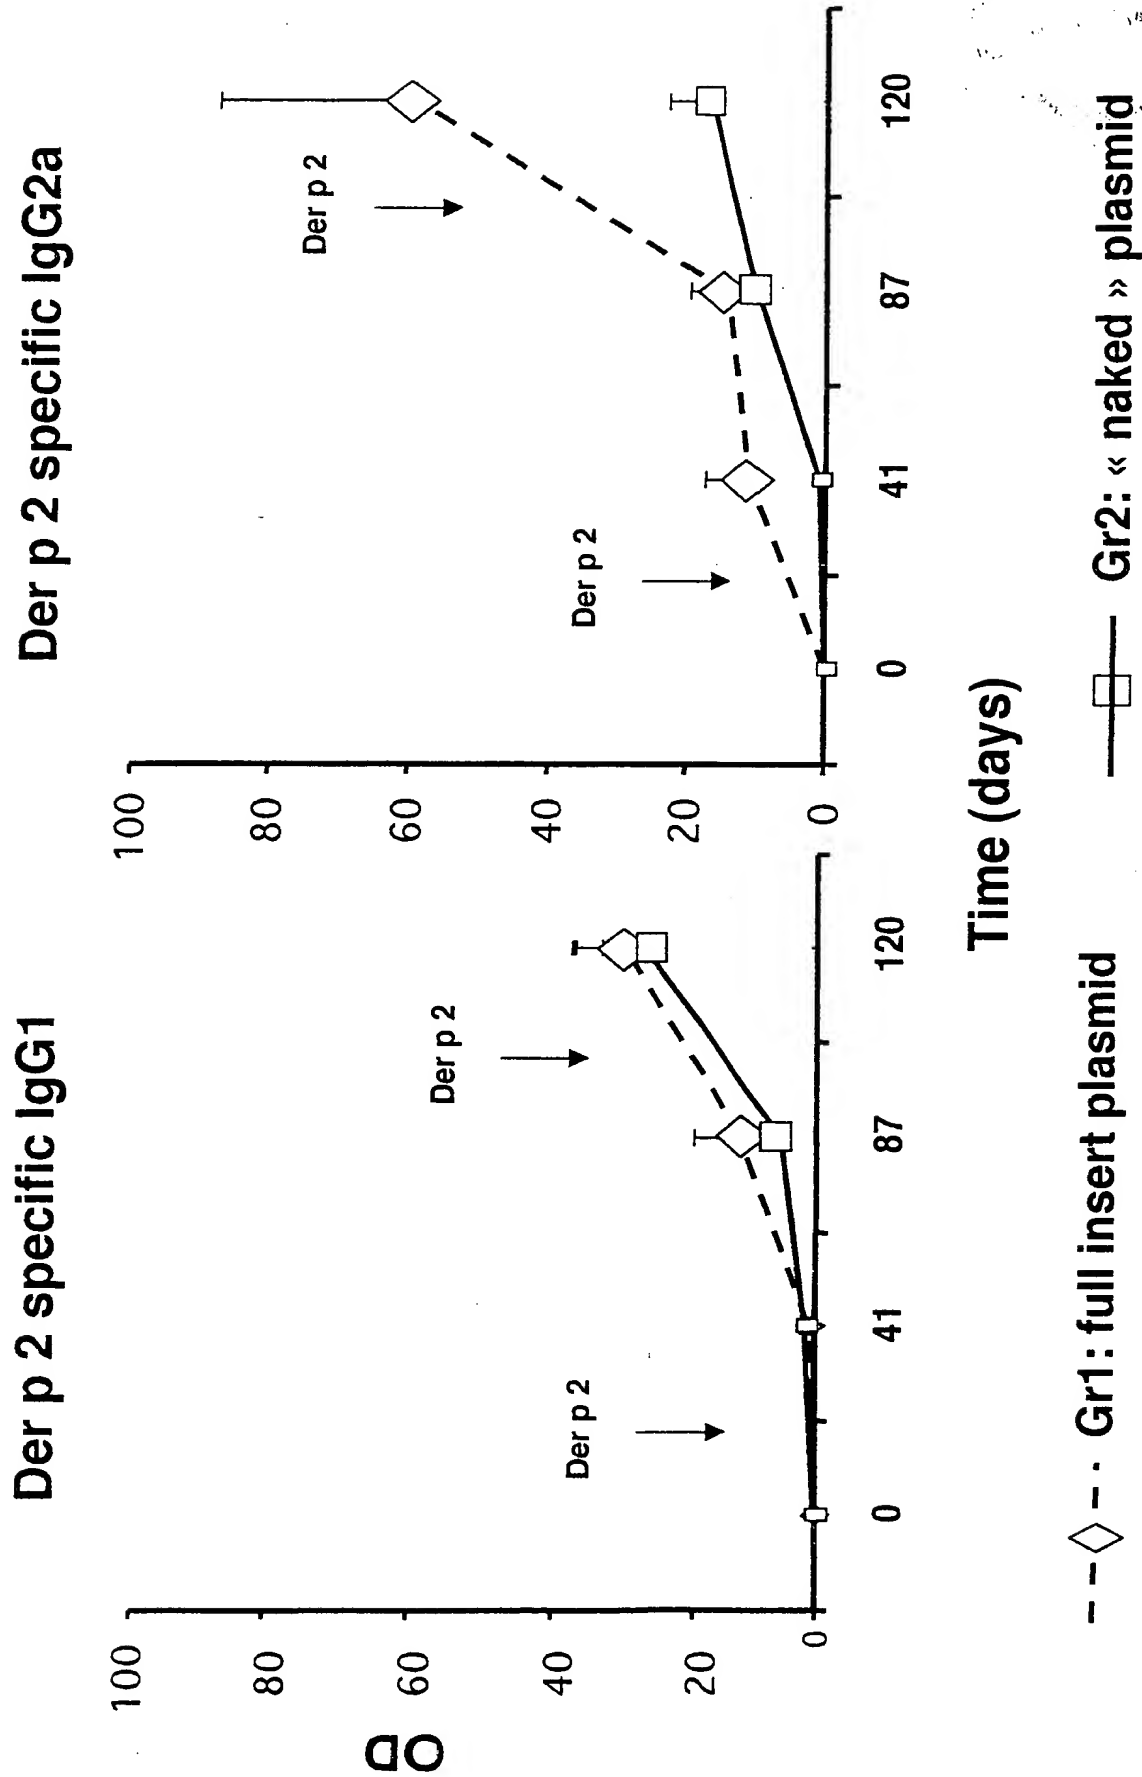

Fig 2
Modulation of an ongoing specific IgG antibody response
by immunisation with the DNA vector
containing the TT-p21-35(Ile28Asn) insert

Induction of a specific IgG antibody response
by a TT-p21-35 synthetic peptide

Fig 3
